

COURSE CODE : SECD 3761

SECTION : 03

PROGRAM PROPOSAL BY S3G22

Title Of Project :	Innovating with Intelligence: AI & Cybersecurity in the Real World
Date Of Project :	8 June 2025
Lecturer Name :	AP Ts Dr Ramesh K S @ Mohd Zaidi
Group Member :	NURUL ADRIANA BINTI KAMAL JEFRI (A23CS0258) FARRA NURZAHIN BINTI ZAHARIL ANUAR (A23CS0079) SAFIYA NURSYAHADAH BINTI MASNOOR (A23CS0176) DAYANG FARAH FARZANA BINTI ABANG IDHAM (A23CS0071) YASMIN BATRISYIA BINTI ZAHIRUDDIN (A23CS0201)

EXECUTIVE SUMMARY

Organizing Team	1. Nurul Adriana binti Kamal Jefri (A23CS0258) 2. Farra Nurzahin binti Zaharil Anuar (A23CS0079) 3. Safiya Nursyahadah binti Masnoor (A23CS0176) 4. Dayang Farah Farzana binti Abang Idham (A23CS0071) 5. Yasmin Batrisyia binti Zahiruddin (A23CS0201)
Programme Details	Title : Innovating with Intelligence : AI & Cybersecurity in Real World Venue : N28A, Kejora Hall Date : 16th June 2025 Time : 08.30 a.m. - 01.15 p.m. Speaker : Encik Mohd Fayad Bin Rosyam
Objectives	1. Demonstrate how AI and Cybersecurity are applied in real-world scenarios to protect data and systems 2. Show the integration of AI and Cybersecurity to improve technological applications 3. Raise awareness of ethical issues and societal impacts of AI and Cybersecurity
Proposed Budget	RM1350
Reference/Written by  (Group Member) Yasmin Batrisyia binti Zahiruddin Secretary +60123455543	Verified by  (Group Leader) Nurul Adriana binti Kamal Jefri Director +6 01129895436

1.0 PURPOSE OF THE DOCUMENT

This paper outlines the idea for a seminar called "Innovating with Intelligence: AI & Cybersecurity in the Real World," which is being organized by students from Section 03 of the SECD3761 Technopreneurship Seminar. The goal is to provide a comprehensive plan for the event, covering everything from objectives and activities to speaker profiles, audience details, committee structure, and logistical considerations. Essentially, this paper acts as a blueprint for ensuring the program runs smoothly and serves as an official reference for the organizing team, academic advisors, guest speakers, and all other stakeholders involved in the event.

This proposal highlights the seminar's theme, which brings together Artificial Intelligence (AI) and Cybersecurity, two fields that are reshaping global businesses. The fusion of AI and cybersecurity is essential for addressing emerging digital threats while also fostering innovation and improving operational efficiency. The carefully designed sections of this seminar are intended to provide participants with a comprehensive understanding of how these technologies intersect and impact real-world practices in areas like data protection, threat detection, and secure software systems.

Furthermore, this paper defines the logistical and technological needs for the seminar, ensuring that every guest has a smooth and professional experience. From setting up multimedia to choosing the right venue and conducting pre-event technical checks, every detail is designed to encourage active, hands-on learning. Additionally, a detailed timetable is included to manage the event's schedule and flow, ensuring that everyone stays engaged during both expert talks and practical sessions.

In addition to event planning and execution details, this document also highlights the important roles and contributions of the organizing committee. Each member has been assigned specific tasks to ensure that all aspects of the seminar are managed effectively. By bringing together everything from speaker backgrounds and program proposals to committee rosters and budget breakdowns, this document serves as a comprehensive guide for creating an engaging, unforgettable, and educational seminar experience.

2.0 OBJECTIVES

The main goal of this seminar is to give participants a strong understanding of Artificial Intelligence (AI) and Cybersecurity and help people understand how both technologies are used in the real world while keeping data and systems secure. The seminar will help attendees improve their skills through hands-on sessions, practical activities and workshops. Furthermore, by focusing on both areas, the seminar aims to demonstrate how they can be integrated to improve technology while ensuring the participants to be better prepared to apply this knowledge in their studies, jobs or businesses and maintaining the security and privacy.

A key goal of this seminar is to show how AI and Cybersecurity are connected and why both are important in today's digital world. Real-world case studies and examples will be shared such as how AI is used to create personalized content, detect cyber threats or improve online safety. The seminar also aims to expose the attendees on ethical issues and the effects of these technologies on society to encourage responsible and fair use.

One of the key highlights of the seminar is a talk by an invited expert who will share valuable knowledge about the latest trends, real-world examples and important challenges in AI and Cybersecurity. This session targets to give participants the chance to meet and exchange ideas with people from different fields, such as students and professionals. Through different activities like discussion, Q&A sessions and networking, the seminar intends to give everyone a chance to learn, ask questions and connect with others.

In the end, this seminar wants to promote lifelong learning. It aims to give participants useful skills, new knowledge and a wider view of how AI and cybersecurity can shape the future. The final goal of this seminar is to allow the attendees to be better prepared to grow in their careers and use technology in smart, safe and creative ways.

3.0 LIST OF ACTIVITIES

- **Expert Insight: AI's Role in Cybersecurity Today**

Our invited speaker will give an introductory presentation examining how artificial intelligence is changing the cybersecurity landscape in the real world. By illustrating current trends, actual difficulties, and potential future directions in AI-driven cyber protection, this session sets the stage for the seminar.

- **Q&A: Ask the Expert**

a question-and-answer period where attendees are free to ask the keynote speaker anything they like. This slot provides a chance for more in-depth conversation, explanations, and individual perspectives on AI and cybersecurity in practical settings.

- **Practical AI for Cybersecurity**

Using actual or simulated data, groups will collaborate to create a basic AI model that can identify cyberthreats during this facilitated session. The goal is to enhance learning through direct experimentation by giving participants real-world, hands-on experience using AI tools for cybersecurity.

- **AI Cybersecurity Challenge**

Teams will compete to solve cybersecurity issues and use AI tools with other groups. In addition to encouraging teamwork and active learning, this gamified exercise shows how AI may be effectively used for real-time danger identification and protection.

4.0 TARGETED AUDIENCE AND POTENTIAL PARTICIPANTS

The “Innovating with Intelligence : AI & Cybersecurity in the Real World” seminar is intended to engage a broad and relevant audience, particularly those involved in or interested in the fields of artificial intelligence, cybersecurity, and information technology. This program aims to bring together individuals from academic, research, and professional backgrounds to discuss real-world applications and challenges at the intersection of AI and cybersecurity.

The primary target audience consists of undergraduate and postgraduate students from University of Technology, Malaysia (UTM), especially those enrolled in programs related to Computer Science, Data Engineering, Software Engineering and Network Security. These students will benefit from exposure to current developments, practical case studies, and expert insights that can complement their academic learning.

In addition to students, academic staff, such as lecturers, professors, and researchers, are encouraged to attend. This seminar presents an opportunity for them to enhance their understanding of current technological trends and explore potential interdisciplinary research collaborations in areas involving intelligent systems and cybersecurity.

Lastly, the seminar is suitable for technology enthusiasts, self-learners, and members of tech communities who wish to deepen their understanding of how AI is being used to solve modern cybersecurity problems. Their presence will contribute to a more dynamic and diverse learning environment.

5.0 TECHNICAL ASPECTS OF THE PROGRAMME

The seminar titled “Innovating with Intelligence : AI & Cybersecurity in the Real World” will be held in Dewan Kejora, N28A, a well-resourced location for a technology-focused event. The technical arrangement will be planned with intention to facilitate an efficient seminar, enliven the theoretical and hands-on components of the programme.

To encourage a thoroughly immersive learning experience the hall will be resourced with contemporary multimedia equipment, incorporating wireless microphones, dance-friendly speaker systems, high-lumen projectors and large projections screens. This equipment will be vital to enable presentations to be executed, stated or demonstrated in any way, to all delegates without any compromise to their clarity. The seating arrangement will also be indicative of both position and interaction, as attendees migrate between keynote talks, participatory sessions and interactive workshops.

As the seminar will be delivered with emphasis on real-world applications, we will provide robust internet connectivity to support access to AI platforms, live demonstrations and collaboration tools in the cloud. Each participant will need to bring their own laptops for the labs and challenge group sessions, but all shared resources/data and shared project environments will be provided by the organizing committee for participants to use online so that participants can focus on the activity and not the setup of essential AI resources before the activity.

We will conduct a pre-event technology inspection to review all physical, software and connectivity readiness. A technical team will be available during the event to respond as needed to equipment failures and to address network connectivity problems quickly, thereby minimizing disruption and enabling smooth session flow throughout the seminar day.

Presenters will use platforms such as Canva and Microsoft Powerpoint for engaging visual mediums and for demonstration portions in which Google Colab, Python and lightweight cybersecurity simulation will be used to demonstrate key ideas. The use of each of the software choices has been premised on the accessibility, ease of use and meaningful representation of industry trends. In the event there are any technical glitches, backup copies of both slides, data files and tools will be on hand.

For audience participation, wireless handheld mics will be handed out to everyone to encourage an open Q/A and conversations during the forum and expert session. In addition to scheduled breaks and other interaction opportunities, participants are encouraged to network with their peers from diverse academic backgrounds and share knowledge with one another.

By addressing these technical considerations, the seminar is designed to create a dynamic, hands-on and professionally managed environment, enabling participants to explore the intersection of AI and cybersecurity through both learning and experience.

6.0 GUEST SPEAKER BACKGROUND

Encik Mohd Fayad Bin Rosyam is a cybersecurity strategist at Logica, a company that specializes in creating AI-driven enterprise solutions. With a wealth of experience in weaving artificial intelligence into cybersecurity frameworks, he has tackled projects focused on threat detection, network security, and ethical AI governance. In his role at Logica, he leverages machine learning to develop predictive models that enhance data security and bolster system resilience. During this session, he'll share valuable insights on how AI is reshaping the cybersecurity landscape in our digital world today.

7.0 IMPACT

7.1 OF THE ORGANIZER

Organizing the “Innovating with Intelligence: AI & Cybersecurity in the Real World” seminar offers valuable experience and benefits to the organizing committee. This program helps enhance essential skills such as teamwork, communication, and event coordination, which are critical for both academic and professional growth.

Through planning, managing logistics, and collaborating with invited speakers and participants, organizers improve their leadership, problem-solving, and time management skills. These experiences allow committee members to adapt to real-world challenges and develop confidence in handling responsibilities effectively.

Additionally, organizing this seminar increases the committee’s exposure and reputation within the academic and professional community. It provides opportunities to build networks with industry professionals, academic staff, and fellow students, potentially leading to future collaborations or career prospects.

Overall, the seminar serves as a platform for organizers to strengthen their professionalism, adaptability, and organizational abilities, preparing them for future roles in both academic and industry settings.

7.2 OF THE PARTICIPANTS

This seminar will have a meaningful and lasting impact on all participants by increasing their knowledge and practical understanding of Artificial Intelligence (AI) and Cybersecurity. Participants will gain valuable insights into how these technologies are applied in various industries. Moreover, they will develop new skills that can be used in their studies, research or future careers and help them stay relevant in today's fast-changing digital world.

Furthermore, participants will benefit from direct exposure to experts and professionals in the field. This will give them a deeper perspective on current trends, future challenges and opportunities in AI and Cybersecurity. In addition, these experiences can guide their academic and career choices especially for those interested in working in the tech industry.

Another important impact of the seminar is the opportunity for networking and collaboration. By meeting people from different backgrounds such as students, educators and professionals, participants can build valuable connections, share ideas and even explore future partnerships.

All in all, participants will leave the seminar with a greater sense of confidence and curiosity in using technology responsible and creatively. The knowledge and connections they gain will support their personal and professional growth and inspire them to be part of the future of smart, secure and ethical innovation. Additionally, this seminar will open the door for the participants for new projects, innovation and continuous learning.

8.0 PROGRAM TENTATIVE

Please refer to **Appendix A**.

9.0 ORGANIZING COMMITTEE

10.0 PROPOSED BUDGET (MYR) TO ENGLISH CONTINGENCY FUND: MISCELLANEOUS EXPENSES

The estimated total expenditure for the program is **RM1350**

The financial breakdown (income and expenses) is as shown in **Appendix C**.

11.0 CONCLUSION

To sum up, this proposal includes all the important details about the upcoming seminar such as its purpose, objectives, target audience, guest speakers, expected outcomes and program schedule. The seminar, titled “Innovating with Intelligence: AI & Cybersecurity in the Real World”, is planned to give participants a better understanding of how AI and cybersecurity are used in real situations and how these technologies are shaping the future.

We have invited Encik Mohd Fayad Bin Rosyam, experienced professional from IT backgrounds such as AI and cybersecurity and one of tech industry leaders to share his knowledge and insights. Our main audience will be students from University Teknologi Malaysia (UTM), especially those from the Faculty of Computing but we also welcome anyone interested in learning more about AI and cybersecurity.

The seminar is scheduled to take place on Thursday, 26th June 2025 at Dewan Kejora, n28a, UTM. We believe this event will benefit everyone involved, helping participants gain useful knowledge and practical skills while also improving the organizers’ abilities in teamwork, communication and event management. This seminar is a great opportunity for both personal and academic growth and we are excited to make it a meaningful and successful experience.

PROGRAMME TENTATIVE

TIME	ACTIVITIES
8:30am	Arrival of students and VIP
9:00am	VIP entered the hall
9:10am	Singing of the national anthem, 'Negaraku
9:15am	Recite dua for the muslim
9:20am	Opening Speech by the Program Director
9:30am	Opening Speech by the Technopreneurship coordinator
9:40am	Opening Speech by the speaker
9:50am	Expert Insight: AI's Role in Cybersecurity Today speaker will give an introductory presentation examining how artificial intelligence is changing the cybersecurity landscape in the real world
10:30am	Q&A: Ask the Expert participants are invited to ask questions directly to the keynote speaker
10:50am	Break
11:00am	Practical AI for Cybersecurity Using actual or simulated data, groups create a basic AI model that can identify cyberthreats during this facilitated session
12:30am	AI Cybersecurity Challenge Teams will compete to solve cybersecurity issues and use AI tools with other groups
1:00pm	Appreciation ceremony to all the VIPs
1:10pm	Photo session
1:15 pm	Seminar dismiss

COMMITTEE NAME LIST

APPENDIX C**FINANCIAL BREAKDOWN**

Expenses	Total
Venue : Rental of N28A Kejora Hall	RM500
Speaker : Encik Mohd Fayad Bin Rosyam	RM200
Audio-Visual Equipment: Microphones, Speaker, Projectors	RM250
Refreshment for speaker	RM100
Materials and Supplies 1. Printing 2. Banner	RM150
Marketing : Online Advertising and Poster	RM100
Miscellaneous Expenses	RM50
	RM1350

Team Member Contribution

Nurul Adriana binti Kamal Jefri - Director

Nurul Adriana has the greatest level of authority in the organizing committee. She is responsible for making all decisions related to planning, coordinating and delivering the event. More specifically her role involves supervising and guiding all committee members, ensuring work is completed on time, completing important decision-making on the programme content, scheduling and logistics and being the main point of communication between the committee and the supervising lecturer and external groups like invited speakers or sponsors.

Yasmin Batrisyia binti Zahiruddin - Secretary

Yasmin manages all office and correspondence functions. She prepares and keeps official documents and records meeting minutes, letters, approvals, timetables and others. She oversees internal correspondence within the committee and directs correspondence with faculty and external partners. Yasmin also serves as an overall secretary, monitoring seminar activities to ensure successful delivery by keeping records and timelines organized and supporting the Director with administrative tasks.

Safiya Nursyahadah binti Masnoor - Treasurer

As treasurer, Safiya manages the financial aspects of the seminar. She is in charge of preparing a detailed budget proposal, recording all income and expenditures and ensuring that all purchases and expenses are properly documented. She collaborates with sponsors, handles funding allocations and ensures that spending is within approved limits. Transparency, accuracy and responsibility are central to her role, which is crucial to the financial health of the event.

Dayang Farah Farzana binti Abang Idham - Event Planning

Dayang is responsible for managing the overall flow and structure of the seminar. She manages venue setup, seating arrangements, materials and venue decorations. Her responsibility is to see that each part of the seminar which are speeches, workshops, group activity and others follow expected time and ordered agenda. Her responsibilities include planning and working closely with other teams, to ensure everything proceeds smoothly and professionally.

Farra Nurzahin binti Zaharil Anuar - Project Manager

Farra is the primary central figure who ensures that all the various divisions within the planning for the seminar are all working together toward a common goal of a successful seminar. At each planning meeting, Farra engages in dialogues with the director about progress on initiatives, establishing deadlines and any issues facing the planning of the event. Working with the seminar's director, Farra facilitates the connection between the various roles filled or tasks assigned, ensuring the work of the event planner, technology team and others is still aligned to achieve the larger purpose of the seminar.

Byeon Woo Seok - Audiovisual and Technical

Byeon oversees all technical and audiovisual components of the seminar. He is in charge of all projector, microphone, sound system and the laptops used by speakers and facilitators for seamless operation. He will ensure they have internet connectivity and ensure presentation files are compatible and will offer to assist anyone needing technical help in person at the seminar. His role is significant since there are usually many tech-related components that must function well so speakers and delegates can concentrate on content and delivery.

J. Y. Park - Panelist Manager

J.Y. is responsible for anything related to the invited speaker and guest panelists. This includes making formal invitations, confirming attendance, arranging transportation and providing information pertaining to the event itself to the panelists. J.Y. Park will ensure that the speaker has what he needs for their session from his presentation materials to assigned time slots. On the seminar day, he will arrange the reception of the panelists and manage the smooth flow of their sessions.

Gracie Abrams - Registration and Check-in Team

Gracie was responsible for managing the registration process for the seminar. She assisted in preparing and organizing the participant registration forms, collecting sign-up details and confirming attendance lists. On the event day, she will oversee the check-in process to ensure all participants are properly registered, receive seminar materials and help to guide to correct locations. Her contribution ensures a smooth and organized experience for all attendees from the moment they arrive.
