Dr. Kamree Aziz
Ceo of HumanLogica

Executive Summary

Planning to invite HumanLogica as a featured company, the upcoming seminar and showcase will be centered on creating excitement for innovative topics in cybersecurity and artificial intelligence (AI). The main objective is to draw in students who want to work in the business as experts, decision makers or tech enthusiasts by emphasizing HumanLogica's expertise in cybersecurity, workforce upskilling and AI transformation. Promotion will use social medias as well as collaborations with IT and academic groups to raise awareness and encourage participation. In addition to showcasing HumanLogica's professional expertise, the goal is to develop a platform that encourage valuable networking and teamwork.

HumanLogica is all about blending AI with a personal touch.

HumanLogica connect with a diverse audience that includes business leaders, tech teams, and the bright minds of tomorrow—the future AI innovators, the students in computing. The mission is to empower people through education, spark innovation, and showcase real-world applications of AI.

Target Audience

”

With an expanding audience in bustling urban tech hubs, HumanLogica reach increase year after year, especially among young professionals and students. HumanLogica bridges the gap between corporate needs and the tech talent of tomorrow, driving digital transformation from the classroom all the way to the boardroom.

Positioning & Messaging

Positioning

HumanLogica sees itself as a progressive AI solution provider that combines state-of-the-art technology with a genuine human touch. The brand is dedicated to making artificial intelligence more accessible, reliable, and beneficial across various fields, such as business, education, and public service. Its core belief is that AI should enhance, not replace, human abilities. By prioritizing secure, ethical, and scalable AI implementation, HumanLogica has become a trusted ally for businesses and individuals navigating their digital transformation journey.

Messaging

The main message of the seminar is that AI and cybersecurity are essential tools for modern organizations, not just future concepts. With experience in AI transformation and cybersecurity through its CyberAnshin framework, HumanLogica shows that innovation must be supported by strong security and clear strategies. The seminar will share examples of how businesses are using AI to improve operations and how cybersecurity plays a key role in protecting digital assets. Key ideas include: “AI helps organizations make better decisions,” “Cybersecurity builds trust in digital systems,” and “Technology works best when it is aligned with people and business goals.” The seminar encourages participants to see AI and cybersecurity as practical solutions that can be used today to solve real problems.

Seminar Day

Host the seminar, manage live updates and collect attendee feedback

Metrics Evaluation

Attendance number

Engagement Rates

From these past activities and engagement rates, we are expecting up to 150 attendees for the seminar and showcase, supported by promoting it through LinkedIn and Instagram to reach a maximize visibility and participation.

Conclusions & Recommendations

The marketing strategy for the seminar “Innovating with Intelligence: AI & Cybersecurity in the Real World” effectively supports the goals of HumanLogica by emphasizing its expertise in artificial intelligence, cybersecurity, and digital transformation. The campaign strategically targets students, young professionals, and business leaders through digital platforms such as LinkedIn and Instagram, as well as through partnerships with academic and IT communities. The messaging clearly communicates the practical importance of AI and cybersecurity, and the campaign timeline is structured to build engagement in phases leading up to the seminar. Based on prior engagement data and outreach methods, the strategy is well-positioned to achieve the target of 150 attendees.

Recommendations

1. **Conduct Post-Event Performance Analysis**

- After the seminar, it is recommended to gather and analyze performance data from all marketing channels. This includes social media analytics, attendance figures, and participant feedback. The insights gained should inform future campaign strategies and highlight the most effective engagement tactics.

2. **Increase Audience Interaction Through Digital Content**

- Future campaigns should incorporate more interactive digital content, such as short video highlights, live speaker previews, or engagement-driven posts (e.g., polls or Q&A sessions). This approach can enhance audience interest and improve reach, particularly on platforms like Instagram and LinkedIn.

3. **Strengthen Institutional Collaborations**

- Expanding partnerships with universities, student organizations, and relevant professional bodies is recommended to broaden the campaign’s reach. Collaborative initiatives, such as guest posts or shared promotional content, can enhance credibility and increase participation from the academic and early-career professional communities.
