a) GAME IDEA

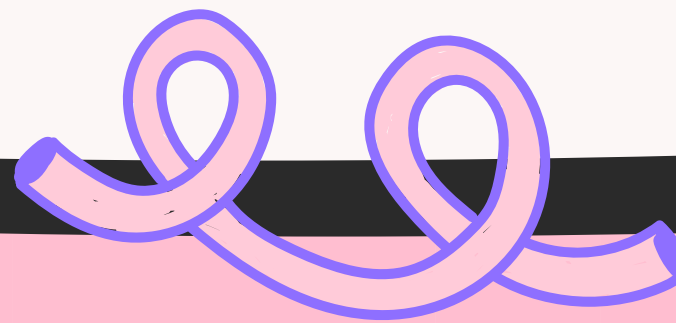

GAME TITLE: SKY PIE (inspired by POU) :

The game appears to be a side-scrolling platformer with the following elements:

- Player Character (Pie): The player controls a character named Pie, which can move left and right and jump.
 - Clouds: These are obstacles or platforms in the game that may affect the player's movement.
 - Ground: This acts as the platform the player character walks on.
 - Food: Collectibles that the player needs to gather to increase their score.
 - Collision Detection: The game detects collisions between the player and other objects like clouds and food.
- 

SYNOPSIS

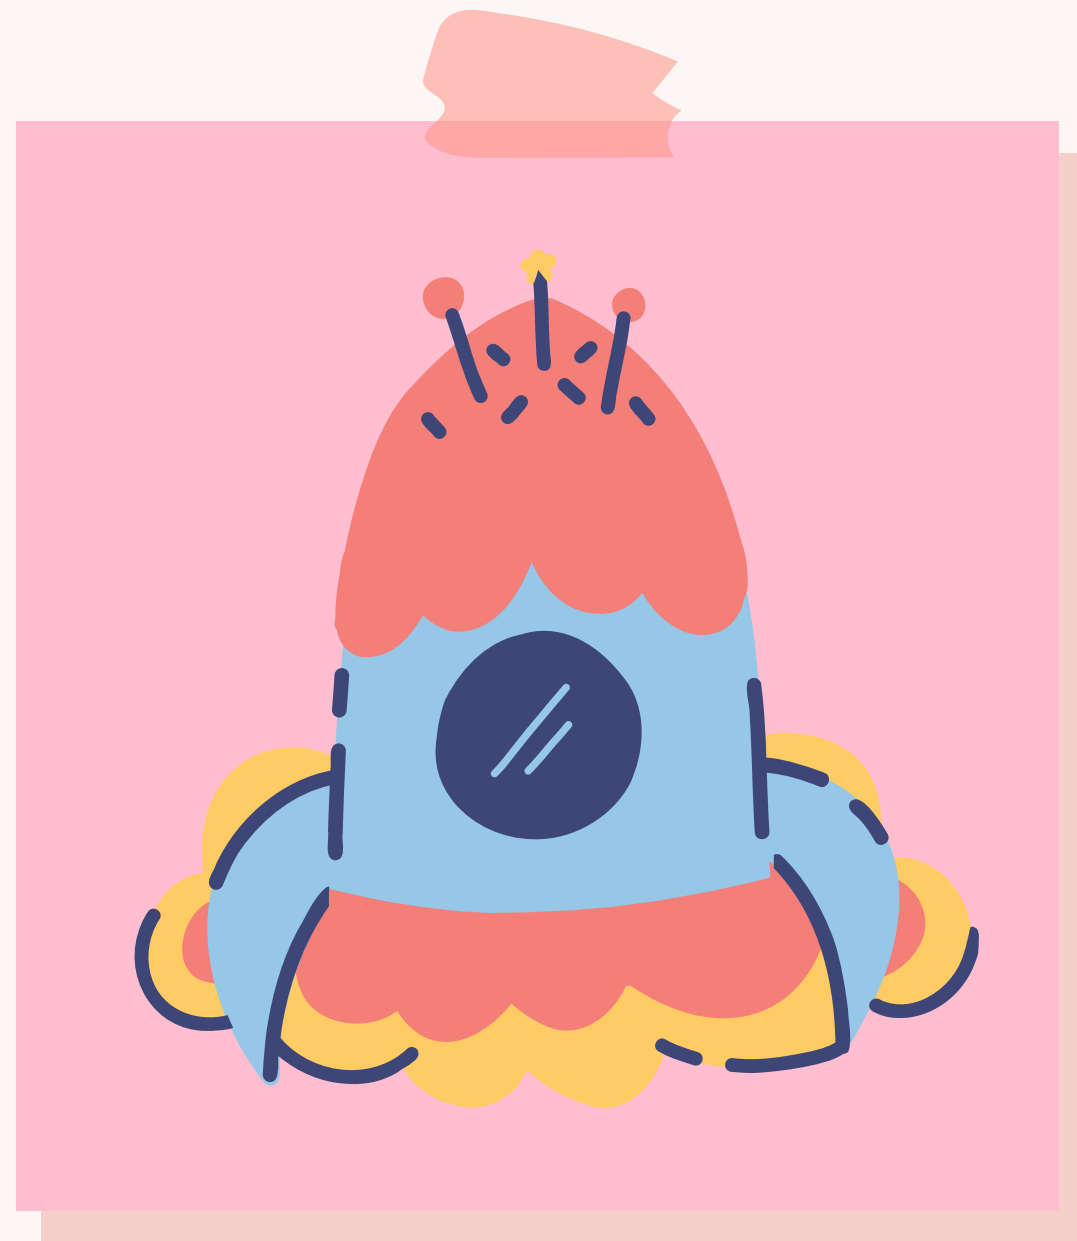

This game requires the player to control Pie, who moves at the commands of mouse click. Clouds act as obstacles, and the ground keeps Pie from restarting the game. Collectible cookie increase the player's score. Collision detection manages interactions with clouds, cookie, and the ground. The goal of this game is to keep the score streak by collecting cookies.

SYNOPSIS

With each click, you'll feel the thrill of reaching for the heavens. The challenge? Balancing Pie's ascent while snatching those scrumptious snacks. It's a skyward journey filled with fun and frolics!

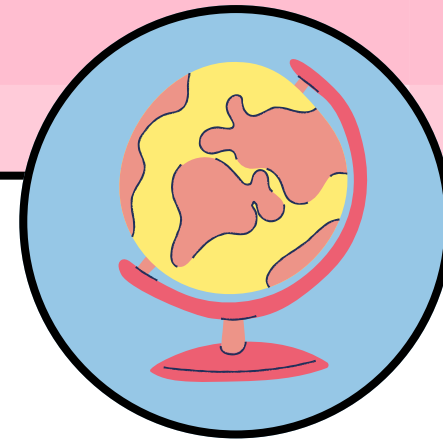

So, are you ready to join Pie on their tasty quest through the clouds? Let's see how high you can soar in "Sky Pie"!

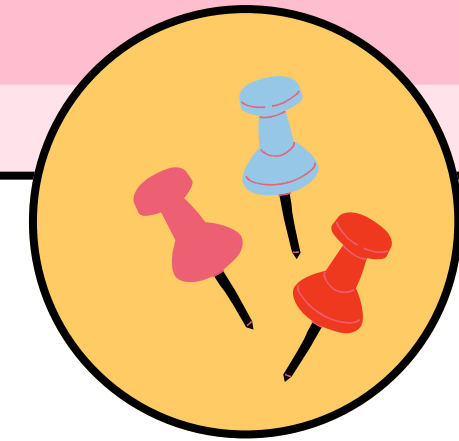

MISSION

Player needs to click the mouse on floating grounds to help PIE.

Points will be added if PIE get on any floating grounds and manages to catch a cookie on it.

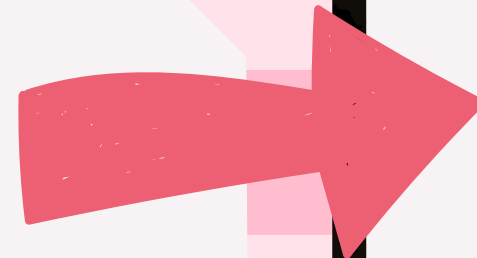

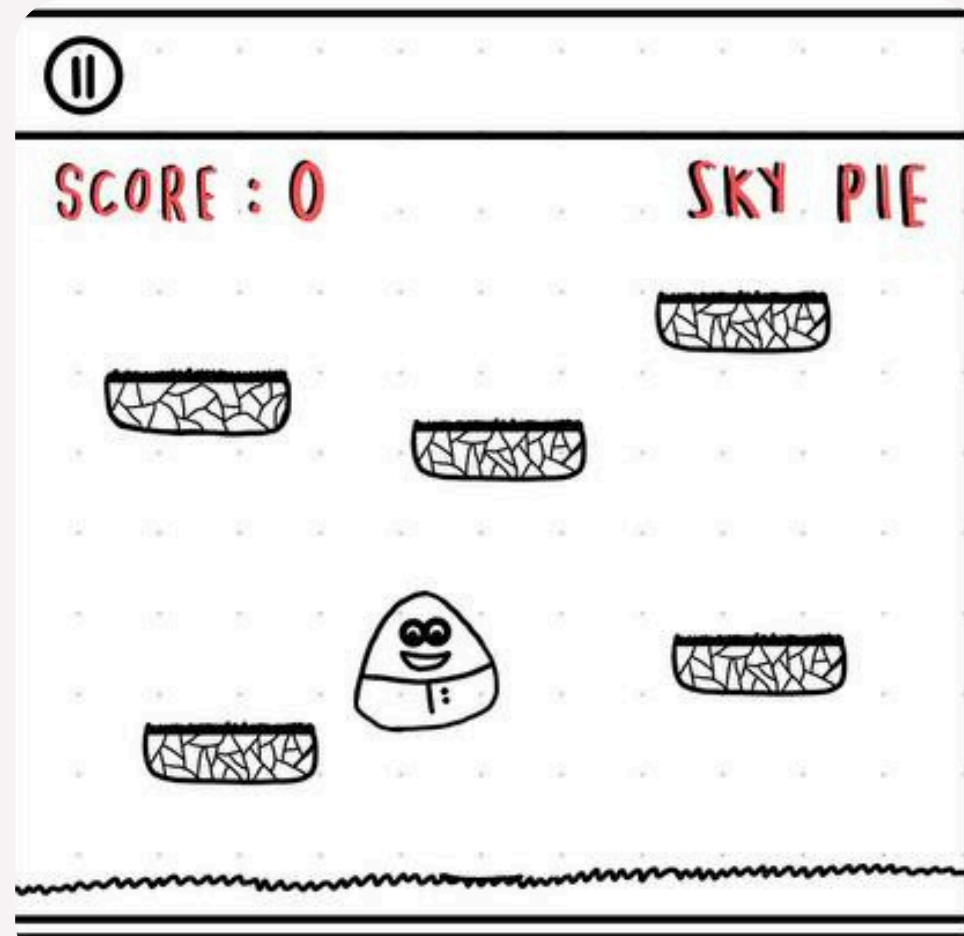

In order to not lose the score streak, player must avoid clicking on any clouds.
